

Supplementary Figure S2. Startup quality-control sensitivity analyses

MAP <65 mmHg | 5-min display | Points and 95% CIs | Original remains primary

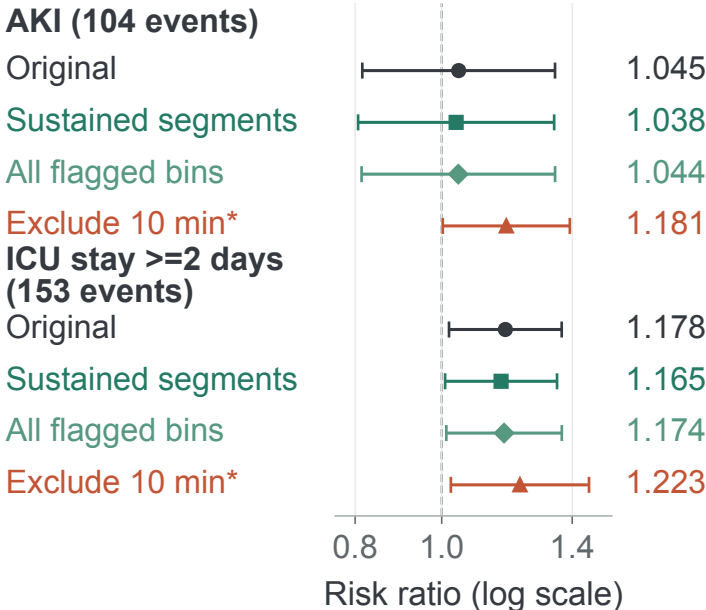

A Reference episodes

B Infusion adjustments

C Postoperative outcomes

* Exclude 10 min: startup-window sensitivity, not artifact correction. Algorithmic sensitivity rules.

Startup-window AKI: RR 1.181 (95% CI 1.003 to 1.391). Outcome models adjust for clinical covariates + total reference burden.
